

**AT-NET Services presents: Search, Share,  
Collaborate with Office SharePoint**

AT-NET Services knows that:  
With Microsoft® Office SharePoint®, it's easy to empower your employees to work together and collaborate more effectively. This groundbreaking software helps improve business insight and productivity by quickly connecting employees with the right information and expertise. Plus your organization can manage information and knowledge across islands of information in a security-enhanced environment.

**Manage content and process.**

Gain comprehensive control over the electronic life cycle to derive more value from information assets and simplify compliance. Streamline everyday business processes across organizational boundaries.

**Improve business insight.**

Enable people to make better-informed decisions at all levels of the organization by presenting business-critical information in one central location.

**Simplify internal and external collaboration.**

Make it easier to search for information and expertise and enhance customer and partner relationships.

**Use a single, integrated platform.**

Reduce the number of platforms to maintain by supporting all the intranets, extranets, and Web applications across the enterprise with one integrated platform.

AT-NET would like to invite you to ***“Search, Share, Collaborate with Office SharePoint!”*** to Learn more about what Office SharePoint can do for your business and how AT-NET can help.
